PieCyfer

SEO AUDIT REPORT

PieCyfer

Website: www.piecyfer.com

AUDIT DATE : JULY 10, 2026

PREPARED BY : PIECYFER MARKETING TEAM

1. Executive Summary

This comprehensive SEO audit was conducted for **PieCyfer.com**, covering technical SEO, on-page optimization, content quality, website performance, authority profile, and competitive positioning. The audit was based on data from **Semrush, Screaming Frog, Google Search Console, Google Analytics 4, and PageSpeed Insights**.

PieCyfer has a strong foundation as an established IT services and software development company with a broad service portfolio, trusted partnerships, client testimonials, and international presence. However, the website currently has limited organic visibility due to low authority, limited keyword rankings, content gaps, and technical optimization opportunities.

The website currently has an **Authority Score of 9/100**, ranking for only **7 organic keywords**, with significant opportunities to improve search visibility. The main growth areas include strengthening service pages, creating industry-focused landing pages, publishing detailed case studies, improving technical SEO, and building authority through targeted SEO strategies.

8	1.6k	62	90	0	1%
Domain Authority	Total Backlinks	Mobile Speed Score	Desktop Speed Score	Organic Users (28d)	Spam Score

1.1 Website Information

Item	Value
Website	www.piecyfer.com
Industry	IT Services, Software Development & Digital Transformation
Audit Date	10 July 2026
Domain Age	7 Years 11 Months 26 Days
Headquarters	San Mateo, California (USA)
Prepared By	PieCyfer Marketing Team

1.4 Key Findings

Website Strengths

- Strong trust signals through client testimonials, Google reviews, Clutch presence, and technology partnerships.
- Established business presence with US and Pakistan office information.
- Well-structured service portfolio covering software development, QA, cloud, CRM, CMS, enterprise solutions, and emerging technologies.
- Secure HTTPS implementation with available XML sitemap.
- Existing blogs and proprietary products (Email Genius, TMS, OnlineDoc) provide opportunities for additional keyword targeting.

Strategic Improvement Areas

- Low organic visibility despite an established domain age.
- Authority Score remains low (9/100) with only 7 ranking organic keywords.
- Limited content depth compared to competitors.
- Technical SEO improvements required:
 - Missing/weak heading optimization
 - Internal linking issues
 - Indexing problems (78 non-indexed URLs)
 - Missing security headers
- Need for stronger SEO assets:
 - Detailed case studies
 - Industry-specific landing pages
 - Expanded service pages
 - US-focused keyword targeting
- Organic search contributes minimal traffic, indicating heavy dependency on direct and referral sources.

1.2 Overall Assessment

Category	Status & Key Observations
Technical SEO	Indexing issues detected; 78 of 124 URLs are not indexed. Missing H1 tags, broken internal links, and security header gaps require improvement.
On-Page SEO	Multiple metadata optimization opportunities exist, including page titles, meta descriptions, heading structure, and internal linking improvements.
Content	Content depth is limited compared to competitors. More industry-focused pages, case studies, and keyword-targeted content are required to build topical authority.
Off-Page / Authority	Authority Score remains low (9/100) despite 1.6K backlinks. Further link-building and authority improvement strategies are required.
Security	HTTPS is implemented, but additional security headers including CSP, HSTS, X-Frame-Options, and Referrer Policy should be configured.
Performance	Desktop performance is strong (90/100), while mobile performance needs improvement due to high LCP and resource optimization issues.

2. Domain Overview

2.1 Semrush Authority Metrics

Metric	Value	Description
Authority Score	9 / 100	Overall strength of website's SEO authority based on backlinks & performance.
Organic Traffic	0	Number of visitors coming to the website from unpaid search results.
Organic Keywords	7	Total search keywords for which the website is ranking in Google.
Domain Authority (Moz)	8	Score that predicts how well the website can rank in search engines.
Page Authority (Moz)	27	Strength of an individual page to rank in search results.
Spam Score	1%	Percentage of low-quality or risky backlinks pointing to the website.
AI Mention of your business	0	How often your website or brand is mentioned in AI-generated results.
AI Cites Web pages of your site	1	Number of times AI tools reference your website pages as a source.
AI Search Visibility	0	Overall visibility of your website in AI-powered search results.

2.2 Backlink Profile

Metric	Count	Description
Total Backlinks	1.6k	Total number of external websites linking to your website.
Referring Domains	201	Number of unique websites that are sending backlinks to your site.
Follow Links	1.2k (72%)	Backlinks that pass SEO value and help improve rankings.
No_Follow Links	447 (28%)	Backlinks that do not pass SEO value but still bring traffic.
Monthly Visits	2.5k	Estimated number of users visiting the website per month.

3. SEO Performance

3.1 Google Search Console

This section evaluates PieCyfer's current website performance using data from Google Search Console (**GSC**), Google Analytics 4 (**GA4**), **Google PageSpeed Insights**, and **Core Web Vitals**. The objective is to assess how users discover the website, how Google indexes it, and how effectively the website performs across desktop and mobile devices.

Google currently recognizes **124 URLs** for PieCyfer. However, only **46** pages are **indexed**. The remaining **78** pages are excluded from Google's **index** for various reasons.

Indexing Issue	Source	Pages
Crawled – Currently Not Indexed	Google Systems	32
Discovered – Currently Not Indexed	Google Systems	9
Not Found (404)	Website	14
Blocked (403)	Website	7
Page with Redirect	Website	6
Excluded by Noindex	Website	4
Other 4xx Issues	Website	3
Alternate Page with Canonical	Website	3

3.3 Major Findings

- Crawled – Currently Not Indexed (32 Pages)** : This is the largest indexing issue. It usually indicates: Thin content, Low-value pages, Duplicate content, Weak topical relevance, Insufficient internal linking
- Not Found (404)** : Pages not found against url
- Noindex Pages** : Four pages intentionally use the noindex directive. These should be reviewed to ensure they are excluded intentionally.

Business Impact

A large percentage of valuable website content is currently unavailable in Google Search. Improving indexing alone could substantially increase impressions and organic visibility without publishing additional content.

3.2 Google Analytics 4 (May 18 - June 14, 2026)

Category	Metrics
Traffic Overview	8 Total Users, 8 New Users, 8 Sessions
User Engagement	12.5% Engagement Rate, 44s Avg. Engagement Time
Traffic Sources	Direct: 7 Sessions (87.5%) • Organic Search: 1 Session (12.5%)
Device Distribution	Desktop: 100% (8 Sessions)
Top Locations	United States (3), Czechia (2), United Kingdom (1), Singapore (1), Pakistan (1)
Top Landing Pages	Home (5), About (1), Career (1), Consultancy & Innovation (1)
Top Viewed Pages	Home (6), About (1), Career (1), Consultancy & Innovation (1)
Event Tracking	Active (page_view, first_visit, session_start, user_engagement)
Conversion Tracking	No key events or conversions recorded during this period

Key Insight

Organic search contributes only a very small portion of traffic. SEO currently plays a limited role in lead generation.

3.3 PageSpeed Insight

3.4 Core Web Vitals

Device	FCP (first visible load)	LCP (main content load)	CLS (layout stability)	Description
Desktop Speed	1.0 s	1.4 s	0	No major optimization issues were identified.
Mobile Speed	4.4. s	7.4 s	0	Mobile performance requires improvement.

Insights

The website delivers **strong desktop performance (90/100)** but **mobile performance needs improvement (62/100)**. While desktop Core Web Vitals are within Google's recommended thresholds, the **mobile LCP of 7.4 seconds** is significantly higher than the ideal **2.5 seconds**, indicating a need for image optimization and reduction of render-blocking resources.

4. Website Audit

A comprehensive website audit was performed covering **technical SEO, on-page optimization, content quality, user experience, trust signals**, and overall website performance.

While the website has a solid foundation with a clean design and transparent pricing, several improvements are required to strengthen credibility, improve search visibility, enhance the patient experience, and better align the website with SmileTrue's education-first business vision.

4.1 Technical SEO

Audit Item	Current Status	Business Impact	Recommendation
HTTPS / SSL	✅ Enabled	Builds user trust and secures website communication.	Maintain HTTPS across all pages and enforce a single canonical HTTPS version.
Canonical Tags	✅ Implemented	Prevents duplicate content issues across pages.	Continue using self-referencing canonical tags on all indexable pages.
Placeholder Content	❌ 1 page contains "Lorem Ipsum"	Placeholder content negatively impacts credibility and SEO.	Replace the placeholder content immediately.
Internal 4xx Errors	❌ 3 Broken URLs	Broken pages waste crawl budgets and create poor user experience.	Fix or 301 redirect all broken URLs.
XML Sitemap	✅ Submitted Successfully	Supports crawling and indexation.	Remove the outdated ai.piecyfer.com sitemap reference.
Low Content Pages	⚠️ 1 Thin Content Page	Thin content reduces ranking potential.	Expand or consolidate the affected "Our Team" page.

4.2 On-Page SEO

Audit Item	Current Status	Business Impact	Recommendation
Page Titles	⚠️ 13 titles exceed recommended length	Long titles are truncated in search results, reducing CTR.	Rewrite titles within 60 characters while prioritizing target keywords.
Meta Descriptions	⚠️ 28 too long; 1 missing	Truncated or missing descriptions reduce click-through rates.	Optimize all meta descriptions with concise, compelling copy and CTAs.
H2 Structure	⚠️ 23 duplicate, 13 non-sequential, 2 missing	Weak heading hierarchy affects readability and SEO.	Use unique, sequential, keyword-focused H2 headings.
Internal Linking	⚠️ 30 links use generic anchor text	Weak internal linking reduces topical relevance.	Replace generic anchors with descriptive, keyword-rich anchor text.
External Links	⚠️ High outbound links on 30 pages	Excessive outbound links may dilute authority.	Audit external links and add rel="noopener" where required.
URL Structure	✅ Mostly optimized (1 long URL identified)	Long URLs reduce readability and keyword relevance.	Shorten the flagged URL and maintain concise URL structures.

4.3 Content Audit

Audit Item	Current Status	Business Impact	Recommendation
Blog	✅ Active (7 recent articles)	Supports topical authority and content marketing.	Continue publishing and strengthen internal linking to service pages.
Content Categorization	⚠️ All recent posts categorized under "ERP"	Weak topical clustering reduces SEO effectiveness.	Create dedicated categories such as AI, Healthcare, CRM, and Legacy Modernization.
Service Pages	✅ Nine core service pages available	Good keyword coverage across services.	Expand each page with FAQs, case studies, and schema markup.
Case Studies	⚠️ Client logos available but no detailed case studies	Missed opportunity to demonstrate expertise and improve conversions.	Publish 4–6 detailed case studies with measurable outcomes.
Product Pages	⚠️ Products linked through PDFs only	PDF documents provide limited SEO value.	Create dedicated HTML landing pages for each product.
Image Alt Text	❌ Missing on 81 images	Reduces accessibility and image search visibility.	Add descriptive alt text to all meaningful images.
Image Optimization	⚠️ 12 images exceed 100 KB	Large images contribute to poor mobile performance.	Compress images and serve modern formats such as WebP or AVIF.
Readability	⚠️ 11 pages difficult to read	Complex content may increase bounce rates.	Simplify content and improve readability on key landing pages.

4.4 Trust Signals (UX + Content)

Audit Item	Current Status	Business Impact	Recommendation
Client Testimonials	✅ 10+ testimonials displayed	Strong social proof and credibility.	Create a dedicated testimonials page and implement Review Schema.
Third-Party Reviews	✅ Google 4.9 & Clutch 5.0 (31 reviews)	Builds trust with enterprise buyers.	Embed review widgets and implement AggregateRating Schema.
Partnership Badges	✅ Microsoft, Google, AWS, Clutch, Upwork, GoodFirms	Reinforces technical credibility.	Create a dedicated Partnerships & Certifications page.
Leadership Profile	✅ CEO profile available	Humanizes the brand.	Add detailed profiles for additional leadership members.
Team Page	⚠️ Team page exists but individual profiles require verification	Buyers expect visibility into technical expertise.	Publish complete team profiles with roles and experience.
Business Addresses	✅ US & Pakistan offices displayed	Strong Local SEO and trust signal.	Implement LocalBusiness Schema for both locations.
Certifications	⚠️ Compliance certifications not displayed	Enterprise buyers often look for compliance standards.	Showcase ISO or other certifications if available.

6. Competitive Analysis

A competitive analysis was conducted across leading software development, AI, cloud, and digital transformation companies targeting the US market. The objective was to understand competitor positioning, SEO strategies, content depth, trust signals, and conversion approaches.

The analysis identified key opportunities for PieCyfer to strengthen its online presence through stronger case studies, industry-focused landing pages, trust signals, and conversion-focused content.

6.1 Competitor Overview

Company	Website	Competitor Type	Business Model	Authority Score	Organic Traffic	Organic Keywords
PieCyfer	piecyfer.com	Our Website	Custom software development, AI, cloud, digital solutions, and IT services	9	0	6
Simform	simform.com	Direct Business Competitor	Digital product engineering, software development, cloud, DevOps, and technology consulting	41	9.6k	9.1k
Andersen	andersenlab.com	Direct Business Competitor	Custom software development, dedicated teams, QA, AI, cloud, and enterprise solutions	34	2.4k	3k
ScienceSoft	scnsoft.com	Direct Business Competitor	Custom software development, IT consulting, healthcare, cybersecurity, and enterprise solutions	49	79k	41.1k
Belitsoft	belitsoft.com	Direct Business Competitor	Custom software development, dedicated teams, AI, SaaS, and outsourcing solutions	33	4.7k	5.2k
Ittransition	ittransition.com	Direct Business Competitor	Full-cycle software development, enterprise applications, modernization, and consulting	48	81.2k	20.9k
10Pearls	10pearls.com	Direct Business Competitor	AI-powered software development, digital transformation, cloud, and cybersecurity	38	6.2k	4.3k
BairesDev	bairesdev.com	Direct Business Competitor	Nearshore software development, staff augmentation, AI, and dedicated engineering teams	43	19.2k	23.3k

6.3 Content Gap & SEO Opportunities

Area	PieCyfer Current Status	Competitor Examples	Opportunity
Case Studies & Client Results	Limited case study content; mainly client logos displayed	Simform, ScienceSoft, Andersen, BairesDev	Create detailed case studies showing project challenges, solutions, technologies used, and measurable outcomes
Industry-Specific Landing Pages	Services are organized mainly by technology/service type	ScienceSoft, Simform, Itransition	Build dedicated pages for Healthcare Software, FinTech Solutions, SaaS Development, E-commerce Software, etc.
Service Page Depth	Service pages lack extensive keyword targeting and supporting content	Andersen, Belitsoft, Simform	Expand service pages targeting high-intent keywords such as "Custom Software Development Company USA"
Client Testimonials & Trust Signals	Testimonials exist but lack detailed proof elements	ScienceSoft, 10Pearls, BairesDev	Add verified testimonials with client names, roles, LinkedIn profiles, and project outcomes
Development Process / How We Work	Limited process transparency	ScienceSoft, Simform	Add dedicated sections explaining discovery, planning, development, QA, deployment, and support workflow
Pricing Guidance	No pricing framework available	ScienceSoft	Add cost estimation guides, pricing factors, and FAQs to reduce buyer hesitation
Technology Expertise Pages	Technology offerings are broad but not deeply segmented	Andersen, BairesDev	Create dedicated pages for React Development, AI Development, Cloud Solutions, DevOps, CRM Development, etc.

Key Competitive Insight

The main gap is **not service capability**. PieCyfer already offers a broad technology portfolio.

The biggest SEO opportunity is converting existing expertise into stronger search assets:

- More detailed service pages
- Industry-specific landing pages
- Client case studies
- Proof-driven testimonials
- US-focused SEO pages
- Educational content targeting buyer questions

This structure will fit well inside a client SEO audit/report similar to your SmileTrue format.

9. Priority Recommendations

9.1 High Priority

Recommendation	Business Impact
Create industry-specific landing pages for key markets including Healthcare, FinTech, SaaS, Enterprise Software, and E-commerce	Helps capture niche search traffic and compete with companies like ScienceSoft and Simform
Publish detailed client case studies with project challenges, solutions, technologies used, and measurable outcomes	Strengthens trust, improves conversions, and builds SEO authority
Resolve indexing issues by reviewing excluded URLs, 404 pages, redirects, and sitemap coverage	Ensures important pages are discoverable and eligible for ranking
Implement complete structured data including Organization, LocalBusiness, Service, Article, FAQ, and Review Schema (where applicable)	Improves search engine understanding and enhances SERP appearance
Improve Core Web Vitals by optimizing images, JavaScript execution, CSS delivery, and mobile loading performance	Improves user experience and supports Google ranking signals

9.2 Medium Priority

Recommendation	Business Impact
Expand existing service pages with FAQs, technical details, benefits, industries served, and supporting content	Improves topical relevance and keyword coverage
Create a dedicated "How We Work" process section covering discovery, development, QA, deployment, and support	Builds trust with US clients evaluating outsourcing partners
Add technology-specific landing pages for React, AI/ML, Cloud, DevOps, CRM, Mobile App Development, and SaaS solutions	Captures more long-tail search opportunities
Improve testimonial sections by adding client roles, company details, project outcomes, and verification signals	Strengthens credibility for enterprise buyers
Create dedicated HTML pages for proprietary products instead of relying only on PDF resources	Allows products to rank independently in search results
Improve internal linking between blogs, services, industries, and case studies	Strengthens topical authority and distributes page authority

9.3 Low Priority

Recommendation	Business Impact
Build high-quality backlinks through technology directories, partnerships, guest contributions, and industry listings	Improves domain authority and organic visibility
Strengthen AI search visibility by optimizing content for AI-generated answers and entity recognition	Improves visibility across emerging search platforms
Continue publishing technical blogs targeting buyer questions and industry challenges	Builds long-term topical authority
Monitor competitor activity, keyword movements, and content gaps quarterly	Helps maintain competitive positioning
Maintain regular technical SEO checks including sitemap, robots.txt, schema, and performance monitoring	Prevents future SEO issues

GA4 & Tracking

- User ID implementation > developer side ✖
- CRM Contact ID integration > developer side ✖
- UTM tracking implementation
- LinkedIn campaign tracking

GA4 Configuration

- Custom Dimensions
- Custom Events

UI/UX Audit & Content Analysis

PieCyfer

UI/UX Audit & Content Analysis

REPORT

PieCyfer

Website: www.piecyfer.com

AUDIT DATE : JULY 10, 2026

PREPARED BY : PIECYFER MARKETING TEAM

1. Executive Summary

The website provides a solid foundation for presenting its services; however, several content, UI/UX, and conversion-related gaps limit its overall effectiveness. Key trust-building and conversion-focused sections, including Why Choose Us, How It Works, Industries Served, Client Success Stories, and Results Metrics, are either missing or insufficiently developed, reducing opportunities to establish credibility and drive user action.

Additionally, inconsistencies in branding, typography, layout alignment, and navigation impact the site's visual professionalism and user experience. While these issues do not affect core functionality, they can negatively influence user trust, engagement, and conversion performance. Implementing the recommended improvements will strengthen brand consistency, enhance content clarity, improve usability, and create a more conversion-focused experience that better supports business growth objectives.

1.1 Key Findings

- Homepage messaging does not clearly communicate the company's value proposition, services, or target audience.
- Several important content sections are missing, including Why Choose Us, How It Works, Industries Served, Client Success Stories, and Results Metrics.
- Limited trust-building elements such as testimonials, case studies, client logos, and performance statistics reduce credibility.
- Service descriptions lack sufficient detail and do not effectively communicate key benefits.
- CTA structure and conversion flow can be improved to better guide users toward desired actions.
- Contact form contains unnecessary fields that may increase user friction and reduce submissions.
- Branding inconsistencies across the website may create confusion and impact user trust.
- UI inconsistencies in layout alignment, typography, spacing, and visual hierarchy affect the overall professional appearance.
- Navigation issues, including broken or unclear user pathways, may impact usability and user experience.
- Overall content structure, user experience, and conversion opportunities can be significantly improved through strategic content, design, and CRO enhancements.

2. UI/UX Analysis

2.1 Executive Summary

The website contains several UI and functional inconsistencies across key pages including team pages and footer sections. These issues mainly relate to layout alignment, typography inconsistency, broken navigation, and branding mismatch.

While the issues are not critical for system functionality, they significantly impact visual consistency, professional appearance, and user trust. Addressing these problems will improve overall usability, design consistency, and brand credibility.

2.2 Priority Fix

Issue	Priority	Impact	Recommendation
Footer mixed branding (KeyHires vs Curated Contacts)	High	Strong brand inconsistency reduces trust and professional appearance	Standardize all branding elements including footer, email, copyright, and social links under Curated Contacts
Back to Our Team button not working	High	Breaks navigation flow and user experience	Add proper routing/link to Team listing page and test across all devices
Team member card alignment issue	Medium	Creates uneven layout and weak visual structure	Use consistent grid system and equal card heights for all team cards
Image alignment inconsistency in service cards	Medium	Affects visual balance and design quality	Standardize image container size and alignment rules
Typography inconsistency across section	Low	Reduces visual consistency and readability	Apply consistent font family, weight, size, and spacing system globally
Hero Section missing clear single primary CTA (multiple competing actions)	High	User confusion reduces conversion rate	Define ONE primary CTA (e.g., "Get Started") and secondary CTA visually subordinate
Hero Section visual balance could be improved due to heavy left content block and cropped right image	Medium	Creates layout imbalance and reduces visual appeal on wider screens	Rebalance grid layout, adjust spacing, and ensure image scaling is responsive

2.2 Issues detail with Snapshot

Issue	Screenshot
Typography inconsistency Observation The text appears excessively bold compared to other sections. Impact The page appears visually unbalanced and less professional, which may affect user trust. Recommendation Standardize font weight, size, and spacing across all sections.	Our Team At Curated Contacts, our team is driven by a shared commitment to innovation, precision, and results. We bring together a diverse group of professionals with deep expertise in data analysis, talent management, and strategic sourcing. We collaborate closely to deliver exceptional outcomes for our clients. 

Issue	Screenshot
Card Alignment Issue Observation Team member cards are not properly aligned, creating an uneven layout. Impact The page appears visually unbalanced and less professional, which may affect user trust. Recommendation Use a consistent card height and apply a structured grid layout to ensure all cards align evenly across desktop and mobile screens.	 A screenshot of a team page showing seven team member cards arranged in two rows. The cards are not aligned to the right, creating an uneven layout. The first row has four cards, and the second row has three cards. Each card includes a headshot, name, title, and a 'View Bio' button.

Issue	Screenshot
Navigation Button Issue Observation The "Back to Our Team" button has no functional link. Impact Users may struggle to navigate back to the team listing page. Recommendation Link the button to the main Our Team page and ensure it works on all devices.	 A screenshot showing a code editor with HTML code for a navigation button. The code is: <pre>← Back to Our Team</pre> . Below the code is a screenshot of the team member card for Bernard Layton, Managing Director. The button is located above the card.

Issue	Screenshot
Footer mixed branding Issue Observation The footer displays KeyHires branding i.e LinkedIn while the website is Curated Contacts & multiple brand colors are used. Impact The page appears visually unbalanced and less professional, which may affect user trust. Recommendation Standardize font weight, size, and spacing across all sections.	 A screenshot showing a code editor with HTML code for a footer link. The code is: <pre>...</pre> . Below the code is a screenshot of the footer content. The footer features the 'CURATED CONTACTS' logo, copyright information, and a table of services, address, and contact information. The footer also includes a LinkedIn logo.

Issue	Screenshot
Navigation Button Issue Observation The "Back to Our Team" button has no functional link. Impact Users may struggle to navigate back to the team listing page. Recommendation Link the button to the main Our Team page and ensure it works on all devices.	 <pre> element_type= widget data-e-type= widget data-widget_type= or.default"> <div class="elementor-widget-container"> <p> < Back to Our Team == \$0 </p> </div> </div> </div> </pre>  Bernard Layton Managing Director Bernard Layton has over 35 years of mid-level and senior-level executive search experience within the Industrial, Engineering, Construction, Business Services, Consumer Products, Professional Services and Financial Services industries. Prior to founding Comhar Partners, he built and lead the Chicago office of Stanton Chase since 2008. Previously, Bernard operated his own search practice (Peoplenext, Nicholas Partners) for over 15 years, assisting both U.S. and multi-national clients with their

Issue	Screenshot
Image alignment inconsistency Observation Team member cards are not properly aligned, creating an uneven layout. Impact The page appears visually unbalanced and less professional, which may affect user trust. Recommendation Use a consistent card height and apply a structured grid layout to ensure all cards align evenly across desktop and mobile screens.	 Our Maps Perfect for planning your next hire, acquisition, or organizational redesign. - See key players by title, function, and org structure - Find talent availability by region or industry - Identify succession, diversity, or acquisition opportunities  Services Include Our leads aren't scraped, they're selected, verified, and ready to engage. - Highly targeted contact lists built from your ICP - Email campaigns, LinkedIn outreach, and texting scripts - Landing page builds and ABM-style personalization

Issue	Screenshot
Hero Section CTA Issue Observation Hero Section missing clear single primary CTA (multiple competing actions) Impact User confusion reduces conversion rate Recommendation Define ONE primary CTA (e.g., "Get Started") and secondary CTA visually subordinate	 CURATED CONTACTS About Services Our Team Contact Get Started Smart Data. Bold Outreach. Real Results. Curated Contacts delivers custom-built data and marketing solutions to help you raise capital, grow your pipeline, and identify top talent—faster and smarter. Explore Our Services Get In Touch

3. Content Analysis

3.1 Executive Summary

The website effectively introduces its services but lacks sufficient clarity, trust-building elements, conversion-focused messaging, and structured content hierarchy. Several important sections such as **Why Choose Us, How It Works, Industries Served, Client Success Stories, and Results Metrics are currently missing**, reducing opportunities to establish credibility and improve conversions.

Additionally, branding inconsistencies across the website may create confusion and impact user trust. Implementing the above recommendations will improve user experience, strengthen brand credibility, enhance content organization, and support higher lead generation and conversion performance.

3.2 Priority Fix

Issue	Priority	Impact	Recommendation
Hero Sections (H1) – Headline are catchy but unclear in value communication	High	Users cannot immediately understand service value, reducing engagement	Replace with a clear value proposition focused on services and target audience
Why Choose Us section is missing	High	No differentiation from competitors, reducing trust and credibility	Add differentiators like verified data, fast delivery, expert support
Services Section – Weak service content & CTAs	High	Low conversion due to unclear service benefits and weak action signals	Add service benefits and stronger action-driven CTAs
How It Works – No process explanation	High	Users do not understand service flow, reducing confidence	Add a simple 3-step workflow (Goals → Data → Execution)
Results & Statistics – No measurable proof	Medium	Lack of credibility and trust signals	Add verified metrics and performance statistics
Industries Served – Not clearly defined	Medium	Users cannot identify relevance to their industry	Add industry list such as SaaS, FinTech, Healthcare, Recruiting
Testimonials – No social proof available	High	Reduced trust and lower conversion potential	Add client testimonials, case studies, and logos
Contact Form – Too many required fields	Medium	Increases friction and reduces form submissions	Simplify form fields to improve conversion rate
Final CTA Section – Missing strong closing CTA	High	Loss of final conversion opportunity	Add a strong CTA section like “Ready to Get Started”
Footer Branding – Inconsistent branding (KeyHires vs Curated Contacts)	High	Creates brand confusion and reduces professional trust	Standardize all branding elements under Curated Contacts
Lack of structured service page hierarchy (Overview → Benefits → Process → Use Cases)	High	Users cannot clearly understand service value and flow, reducing conversions	Redesign service pages with structured hierarchy: Overview, Benefits, Process, Use Cases, CTA

3.3 Home Page Content Structure

Current Key Issues	Proposed Structure	Current Structure Snapshot
Hero section lacks clear value proposition	Strong H1 with clear service + audience + outcome focus	<H1> Smart Data. Bold Outreach. Real Results. <H2> What We Do <H3> Funding Intelligence <H3> Lead Generation <H3> Talent Mapping <H2> FAQs <H2> Companies We've Worked With <H2> Contact Us To Get Started
Missing key sections (Why Choose Us, How It Works, Testimonials)	Add structured sections: Why Choose Us → Services → How It Works → Results → Testimonials	
Weak trust-building elements	Add logos, case studies, metrics, client success stories	
Unclear CTA hierarchy	Define single primary CTA with supporting secondary CTA	
Poor content hierarchy	Follow structured flow: Value → Services → Process → Proof → Conversion	

3.4 Service page Content Structure

Current Key Issues	Proposed Structure	Current Structure Snapshot
Value proposition is unclear in hero section	Benefit-driven headline with clear outcome focus	<H1> Lead Generation <H2> Services Include <H4> Our leads aren't scraped, they're selected, verified, and ready to engage. <H3> Highly targeted contact lists built from your ICP <H3> Email campaigns, LinkedIn outreach, and texting scripts <H3> Landing page builds and ABM-style personalization
Content is generic and not result-oriented	Add structured benefits + measurable outcomes	
Services not grouped into clear sections	Divide into: Key Benefits → Deliverables → Use Cases	
Missing trust elements	Add case studies, results, and client logos	

3.5 Our Team page Content Structure

Current Key Issues	Proposed Structure	Current Structure Snapshot
--------------------	--------------------	----------------------------

No clear hierarchy of team members	Group by roles (Leadership, Marketing, Research, etc.)	<H1> Our Team <H3> Bernard Layton <H3> Morgan Layton <H3> Nick Layton <H3> Dakotah Brown <H3> Katrina Falcon <H3> Jake Ryan <H3> Paul Ahern
Team cards lack supporting context	Add short role-based descriptions under each member	
Layout alignment and spacing issues	Use consistent grid system and equal card heights	
Missing team intro and culture section	Add introduction about team expertise and company culture	
No engagement or CTA section	Add "Meet Our Team / Contact Us" CTA section	

3.6 Team Member Page Content Structure

Key Issues	Proposed Structure	Current Structure Snapshot
Content is unstructured and text-heavy	Break into sections: Summary, Experience, Education	<H2> Bernard Layton <H3> Managing Director <H2> Contact Information
Experience and education not separated	Use structured blocks for each section	
Weak personal branding at top	Add strong executive summary headline	
Contact info not highlighted properly	Create dedicated contact card (email, phone, LinkedIn)	
No navigation/CTA flow	Add "Back to Team" and "Contact" CTA sections	

4. Conclusion

4.1 Overall Assessment

- Based on the complete audit, Curated Contacts website has a strong service foundation but requires significant improvements in UI/UX design and content structure to enhance clarity, consistency, and conversion performance.

4.2 Key Issues Impact

- The current gaps such as missing content sections (Why Choose Us, How It Works, Testimonials), weak CTA hierarchy, limited trust-building elements, and branding inconsistencies are negatively impacting user engagement, credibility, and overall user experience.

4.3 Business Benefits of Improvements

- Implementing the recommended changes will improve user understanding, strengthen brand trust, enhance navigation flow, and significantly increase lead generation and conversion rates.

4.4 SEO Impact

- From an SEO perspective, improving content structure, adding informational sections, and optimizing internal hierarchy will enhance crawlability, keyword relevance, and overall search engine visibility.

4.5 Risk of No Action

- If these issues are not addressed, the website may face reduced organic rankings, higher bounce rates, poor user engagement, and lower conversion performance due to weak content clarity and inconsistent user experience.
